STICK & RUDDER | MEETING MINUTES | Meeting Day

Frank Tiano Fly In | 100 MISSIONS 2026 | EVENTS, EVENTS, EVENTS!!

IRCC CONGRATULATES DREW POWELL!

SCHOLAR ★ STUDENT ★ PILOT ★ FUTURE ENGINEER

The Imperial RC Club is proud to celebrate **DREW POWELL**, an outstanding member, leader, and role model in our flying community. Drew's dedication to modeling, learning, and excellence has taken flight in a big way!

SCHOLARSHIP RECIPIENT!

Drew has been awarded an **AMA Scholarship** in recognition of his passion for aviation and commitment to STEM!

THE UNIVERSITY OF
TENNESSEE
KNOXVILLE

ACCEPTED!

Drew has been accepted to the University of Tennessee as an **Engineering** major!

Drew's journey in RC has been nothing short of inspiring—from mastering the skies to now pursuing his dreams in higher education.

WE ARE PROUD OF YOU, DREW!

Your hard work, humility, and heart make IRCC a better place. The sky is just the beginning—the future is yours to engineer!

CONGRATULATIONS, DREW!

We can't wait to see where your passion and talent will take you next.

Stick and Rudder

This Month's Cover:

Glenn Griffin and his Flightline P-51 Mustang 65" Wingspan, 6S Electric from Motion RC

By IRCC President Kevin Pazda

Frank Tiano Scale event – Was another success! Special thanks to all who helped make

this event a great experience! The effort put forth to prepare the field, making banners for the entranceway, working registration, raffle, concessions, and cleanup, all make for an enjoyable, memorable event. A huge thank you to our sponsors as well! From the hobby industry to the generous club members who help to sponsor various bits, everyone worked together to make this show go on.

Smile, the cameras are recording – We are now wired up, and the video is operational. As part of the security improvements, Benny Paz and David Dewitt have collaborated to connect the video system to the outside world. We are still working on the power reliability situation and expect to resolve that soon.

AED - The AED has been deployed, and a training session was held in the May meeting. I have included information in this newsletter to help guide those who were unable to attend.

Mowing – With the beginning of the May showers, we will be mowing the grass every week. If you have an interest and have some time to mow some grass, make it known. If you could help schedule the volunteers, that would help out as well. If you like changing oil or sharpening lawn mower blades, we have a place for you as well; this can be a team effort. I will say that it is very satisfying to stop and look around at the freshly cut field, enjoy the smell of the grass, and be proud of a finished job.

Stick and Rudder Continued

Health and Wellbeing – Summer has arrived. Take care not to overexert yourself, stay hydrated, and take those rest breaks when you need them, and watch out for one another.

Upcoming IRCC events

- **National Model Aviation Day, August 22nd, complete with our Tri-Fecta Fun Fly!**

I hope you get out to the field, get in a couple of flights, look out for your neighbor, and enjoy the little things.

Sincerely,
Kevin Pazda
Imperial R/C Club President 2026

We are hobbyists who dream, design, build, and fly model aircraft of all sizes for fun and competition. We do this because we enjoy the company of fellow enthusiasts, we love flight, and we want to see participation in our hobby grow.

Stick and Rudder Continued

Continuous Information Update:

The 100 RC Missions Over Florida is alive and well for the 8th consecutive year! The 100 Missions flight log is posted in the case at the center of the main pavilion. Remember, this is a “Health Barometer”; if you’re feeling sick or curmudgeonly, come to the field, log some flights and you’re guaranteed to feel better! Even if you get your “100”, please keep logging your sorties throughout the year as it is interesting to see the number of sorties that get logged by our members.

If you notice anything broken or destroyed at the IRCC facility, please let Bill Pawl know about it and set the item aside, out of the way so that we may dispose of it properly.

If you’re interested in joining the grass-cutting crew and you can spare some time to join the crew, it would certainly be appreciated to give those who are currently on the crew some welcomed relief, as it takes a few hours to cut the field so that all of our members can fly safely on our well-manicured field and runways! Tom Carracino will coordinate any training needed to operate the equipment. Please contact Tom Carracino via email at pcgboca@yahoo.com to join the crew!

As a reminder, please do not fly over our northern boundary, which is the Se7en Wetlands and a bird sanctuary just north of our field. If you see someone flying over the wetlands, say something to that pilot! The IRCC membership has been doing a great job not flying over this boundary since it was made aware to us in February 2020!

No guest should be flying unless they are invited by an IRCC member, the member is present when their guest arrives, and the guest has a valid AMA membership. If you’re unsure, ask the person in question to see their AMA and who their IRCC sponsor is. As a member of the IRCC you have that right.

Get out to the field, introduce yourself to someone you don’t know, and make a new friend, when landing keep your wings level with the horizon and main gears first as gently as you can!

See you at the field!

Kevin Pazda

Imperial R/C Club President 2026

The infographic is split into two columns: Heat Exhaustion (orange background) and Heat Stroke (red background). In the center is a stylized human figure with a red-to-orange gradient, wearing a white visor and holding a water bottle. To the left of the figure, under 'Heat Exhaustion', are symptoms: Dizziness, Thirst, Heavy Sweating, Nausea, and Weakness. To the right, under 'Heat Stroke', are symptoms: Confusion, Dizziness, and Becomes Unconscious. Below the figure, a note states 'Heat exhaustion can lead to heat stroke.' On the far left, under 'ACT FAST', are instructions: Move to a cooler area, Loosen clothing, Sip cool water, and Seek medical help if symptoms don't improve. On the far right, under 'ACT FAST', is the instruction 'CALL 911' followed by: Move person to a cooler area, Loosen clothing and remove extra layers, and Cool with water or ice. At the bottom, logos for NOAA, CDC, and NIOSH are on the left, the slogan 'Stay Cool, Stay Hydrated, Stay Informed!' is in the center, and a small image of a person is on the right.

Heat Exhaustion	Heat Stroke
ACT FAST <ul style="list-style-type: none">• Move to a cooler area• Loosen clothing• Sip cool water• Seek medical help if symptoms don't improve	ACT FAST CALL 911 <ul style="list-style-type: none">• Move person to a cooler area• Loosen clothing and remove extra layers• Cool with water or ice

<i>Heat exhaustion can lead to heat stroke.</i>	<i>Heat stroke can cause death or permanent disability if emergency treatment is not given.</i>

NOAA CDC NIOSH Stay Cool, Stay Hydrated, Stay Informed!

How To Use An AED

Review the step by step instructions for using an automated external defibrillator to treat ventricular fibrillation and cardiac arrest.

Before using an [AED device](#), you should:

Confirm Sudden Cardiac Arrest

Call 9-1-1 (emergency services / professional emergency responders) and retrieve the AED

Begin CPR (cardiopulmonary resuscitation)

- a. Begin by giving 30 chest compressions 2 inches deep into the chest and 2 quick rescue breaths to the victim. The chest should expand making it clear that air is coming into the chest.
- b. Repeat the cycle (continue chest compressions up to 100 per minute, Rock to the tune of the Bee Gees “Stayin’ alive”).

How To Use An AED

1. Turn the AED on.
2. Expose the victim’s bare chest and make sure it is dry.
3. Remove any metal jewelry or accessories on the victim. Shave the person’s chest if hair is present. If the victim is a female with an underwire bra, remove it to prevent electrical conduction. Wipe the chest to remove moisture if needed.
4. Apply the [AED pads](#) to the chest area. Learn more about [AED pad placement here](#).
 - a. Place one pad on the upper right side of the victim’s chest, just below the collarbone.
 - b. Place the other pad on the lower left side of the victim’s chest. The lower left ribs below the armpit is the best location for placement on this side.
5. If two rescuers are present, one person can perform CPR while the other is responsible for applying the pads correctly. However, if you are the only one near the victim, alternate between administering CPR and operating the [AED](#).
6. Follow the AED prompts
 - a. Position the AED near the victim’s head and turn on the device. You’ll see either a button to turn on the AED, or simply be able to lift the lid in order to power it on. As the AED is turned on, it will display a series of prompts, such as how to attach the cables for the defibrillator pads into your AED, usually on top of the device. Follow these prompts.
7. The [AED machine](#) will analyze the victim’s heart rhythm to see if an electrical shock is needed. The device will alert you if the CPR you’ve been doing prior to retrieving the device needs to continue. Make sure everyone stands clear and does not touch the victim.

How To Use An AED (Continued)

8. There are two possible prompts after the AED analyzes the heart's rhythm:
 - a. Shock Advised: The victim has no pulse. The AED delivers an electrical shock to restore the heart's normal rhythm
 - b. No Shock Advised: The victim has regained a pulse but is not moving or breathing. A shock from the AED is not needed. Continue with CPR until professional emergency responders or other healthcare providers arrive on the scene.
9. Shock the victim.
10. The AED has advised that you shock the victim. Shout “clear!” to ensure everyone stands clear of the victim. Then **press the shock button** on the AED. One electric shock will be delivered through the pads in an effort to restart the victim's heart. You'll see the victim move due to the shock's force.
11. After the shock, give 30 chest compressions and two breaths.
12. Over the next two minutes, you'll return to CPR, following a pattern of compressions and quick breaths. You may see the victim regain consciousness in this stage. After two minutes has passed, let the AED reanalyze for a heart rhythm. It can tell you if another shock is needed and if you need to stop CPR.

The IRCC AED is located in the main pavilion in the SW Corner of the pavilion.

IRCC Meeting Minutes

May 2, 2026

Total Adult members 75 / Needed for Quorum (20% w/2 Officers) 15

Members Present: 22

- The Pledge of Allegiance. Said at 10 am
- Visitors or new members. Danny Vita
- Awards/Certificates
- Model of the month certificates, Brian Rivers
- 100 Mission Glenn Griffin
- Minutes – Motion to accept as published in the newsletter. Accepted
- Treasurer Report – June payments are due next month for those who split the year.
- Membership Report Currently 75 Full adults, 81 total
 - NOTE: The difference in the membership report between the top of the minutes regarding membership and the Membership Report at this bullet reflects the known membership status at the start of the meeting, and the membership tally is updated during the meeting at this bullet point by the Treasurer.
- Field and Maintenance Report – Any Issues? None
- Instructors Report – ready and able to teach. Preston Falk is teaching River and progressing well
- Safety Report - Remember to use the frequency board if flying 72mh transmitter
- Club Newsletter - Jerry McGhee All good
- Website - Ron McKie Not present
- New Field Developments – None

IRCC Meeting Minutes Continued

- Old Business –
 - AED Update: it is mounted, and a class will be held post-meeting
 - Camera system Update installed by Benny, and looking into power and internet access
- New Business – Steve Stevens proposed a memorial board for the IRCC.
 - Vice President Jerry McGhee motioned to table this proposal until the Executive Committee could assess costs associated with a proposal. Motion to table passed.
- Future Events (6-month look-ahead)
 - **Frank Tiano scale event, May 7-10**, all set raffle prizes, food, volunteers still needed
 - [National Model Aviation Day 2026](#) will be celebrated on Saturday, August 22, 2026. This day is dedicated to promoting the hobby of model aviation and encouraging clubs to celebrate it with community events. The AMA Foundation is excited to host various activities and events on this day. Making it a great opportunity for model aviation enthusiasts to gather and share their passion for flying models._
- Over and Above Award: Benny Paz and Steve Stevens
- From the Shop – Bob Curry
- Model of the Month - Glenn Griffin with his Flight line P51 Mustang
- Announcements:
 - 50/50 Drawing - Wally Sundy
 - Meeting Closed. 10:50
